## **CONDITIONS OF HIRE**

All equipment hired remains the property of Steve Lovell Associates Ltd. (Hereafter referred to as the Company)

Hire charges are based on the period of the contract irrespective of whether or not the equipment is in use.

Hire commences upon delivery to the Customer and ceases upon return to the Company. Equipment is not regarded as returned to the Company until it is checked and inspected by an authorised member of the Company's staff and a formal receipt issued on behalf of the Company.

Equipment hired will be entirely at the Customers risk during the hire period and the Customer will be responsible for any loss or damage thereto howsoever arising. The Customer undertakes responsibility for insuring equipment against "all risks" to full replacement value. Any loss or damage to the equipment is to be reimbursed to the Company by the Customer to the full replacement value thereof.

The customer will be responsible for ensuring that any relevant regulations, rules or statutory provisions governing, or relating to the use of the hired equipment are complied with during the period of hire and the Company in no way assumes liability for the consequences of any non-compliance with any such regulations, rules or statutory provisions.

Equipment will be supplied to the Customer in normal working order, the Company's liability for any defect or failure of the equipment is limited to the rectification of any defect or failure arising from normal usage.

The Customer undertakes to ensure that the Company's equipment shall not be used for any purpose beyond its capacity or in any manner likely to result in undue deterioration of the equipment.

The Company cannot be responsible for any injuries to personnel or damage to property consequential to and arising from any improper use of the equipment by the Customer or by any other person whether or not authorised by the Customer, during the period of hire.

Equipment hired must not be altered by the Customer or modified in any way. In particular, cables must not be cut and plugs and sockets must not be required by the Customer. Any equipment found to be modified or in any way altered and any cables or components found to be damaged by cutting or attempts at any modification will be charged at replacement price upon return.

Any damage to, or failure of, or defect in any hired equipment must be notified to the Company within 24 hours of its occurrence and confirmed in writing within three days of initial notification. In the absence of such notification the Customer will be charged with the cost of repair or replacement.

The Customer will be responsible for advising the Company as to the location of the hired equipment during the period of hire and of any changes in such location.

If agreed hire charges are not paid on the due date then the Company will reserve the right to repossess the hired items and will not be liable for any damages or loss which may be suffered by the Customer as a consequence of such repossession.

In the event of equipment ordered not being available for hire through circumstances beyond the control of the Company, the Company reserves the right to substitute equipment of similar quality for all or part of the duration of hire.

No information or data contained in any of the Company's catalogues or price lists shall be deemed to constitute any part of a contract of hire, such information being for the purpose of general description only.

Before issuing any equipment for hire the Company may require a deposit from the Customer which may be any sum up to the full amount/replacement cost of the equipment hired. Similarly, the Company may at its discretion require payment of the hire charge, in full, in advance.
